

# Clinical Master Class on the Management of Asthma and COPD.

Asthma or COPD does it matter?

What is new in our COPD treatment approach?

Dry powder or pMDI? – How to choose?

Is spirometry essential in general practice?

Is theophylline a useful drug?

What is available for children with asthma?

When should I step down treatment?

Inhaled steroids why, when and how much?

Can we adequately treat our state patients with what we have?

Can you explain how this device works? (Company representatives will be there to demonstrate)

How do I encourage adherence?

UCT Lung Institute  
15<sup>th</sup> Oct 2016

**Faculty:** a/Prof Richard van Zyl-Smit (Lung Clinical Research Unit UCTLI), Dr Jan Vermeulen (Pediatrician Private practice, Emeritus Prof Eric Bateman UCT Lung Institute,
